

### kit DVD player

All KIT systems come with a compact CD/DVD player incorporating HDMI™ technology. Complete with a radio tuner, USB connection and MP3 capability via KEFDock (KEFDock sold separately).

DVD player in High Gloss Black or Matt Silver

### kit120

A complete surround sound system from only two compact front speakers. Ingeniously designed lateral radiators generate virtual centre and rear effects channels.

Speakers in High Gloss Black or Matt Silver

### kit140

True surround sound from just two mid-size Uni-Q® front speakers each with 7 drivers to produce an incredible sound stage.

Speakers in High Gloss Black or Matt Silver

### kit160

Two slim floorstanders with 11 drivers each, including front-firing Uni-Q arrays and lateral radiators generating rear and centre effects.

Speakers in High Gloss Black or Matt Silver

### kit510

A full 5.1 system based on KEF's ultra-compact and deceptively powerful 'egg' speakers with 75mm (3in.) Uni-Q drivers.

Speakers in High Gloss Black or Matt Silver

### kit520

A more powerful 5.1 system based on five award-winning 'egg' speakers incorporating KEF's 100mm (4in.) Uni-Q drivers and 19mm (0.75in.) tweeter.

Speakers in High Gloss Black or Matt Silver

## why KEF?

It all started with a sound engineering genius called Raymond Cooke. Inspired by a passionate belief in the power of new materials and technologies to heighten the enjoyment of recorded sound, he single-handedly revolutionised loudspeaker design. That was back in 1961 - and KEF loudspeakers have ranked among the finest in the world ever since. No other manufacturer has more audio engineering 'firsts' to its credit than KEF.

So when modern home entertainment formats arrived, this same spirit of innovation naturally came into its own. With several award-winning 'audiophile' quality speakers to choose from, we designed a new range of complete home theatre systems - one for every room size, budget and personal style.

As well as KEF's legendary clarity, spaciousness and freedom from distortion, what they all share in common is that unlike other high-end systems, they're incredibly easy to set up - usually in a matter of minutes. Hence the name: KEF Instant Theatre (KIT).

### kit subwoofer

Every KIT system comes with a closed box 250mm (10in.) long-throw high performance subwoofer with integral power amplifier.

Subwoofer in Matt Black or Matt Silver

### kit530

The ultimate 'egg' 5.1 system, combining the latest ribbed cone 115mm (4.5in.) Uni-Q array, Sealed Suspension Technology and dedicated high performance centre channel.

Speakers in High Gloss Black or High Gloss Silver

### kit540

Perfect for large flat screen TVs, with five slender wall or floor-mounted speakers housing 75mm (3in.) long-throw bass drivers alongside each Uni-Q array.

Speakers in High Gloss Black or Matt Silver

### kit550

With the revolutionary Uni-Q array flanked by four long-throw midrange/bass drivers per speaker and KEF's ACE technology, this is one of the best sounding surround systems that money can buy.

Speakers in High Gloss Black or Matt Silver

### kit570w

All the performance of the kit540 with the addition of KEF's clever wireless technology for the rear speakers. CD quality surround sound with no cables to run across the room.

Speakers in High Gloss Black or Matt Silver  
Wireless modules only in High Gloss Black

### kit580w

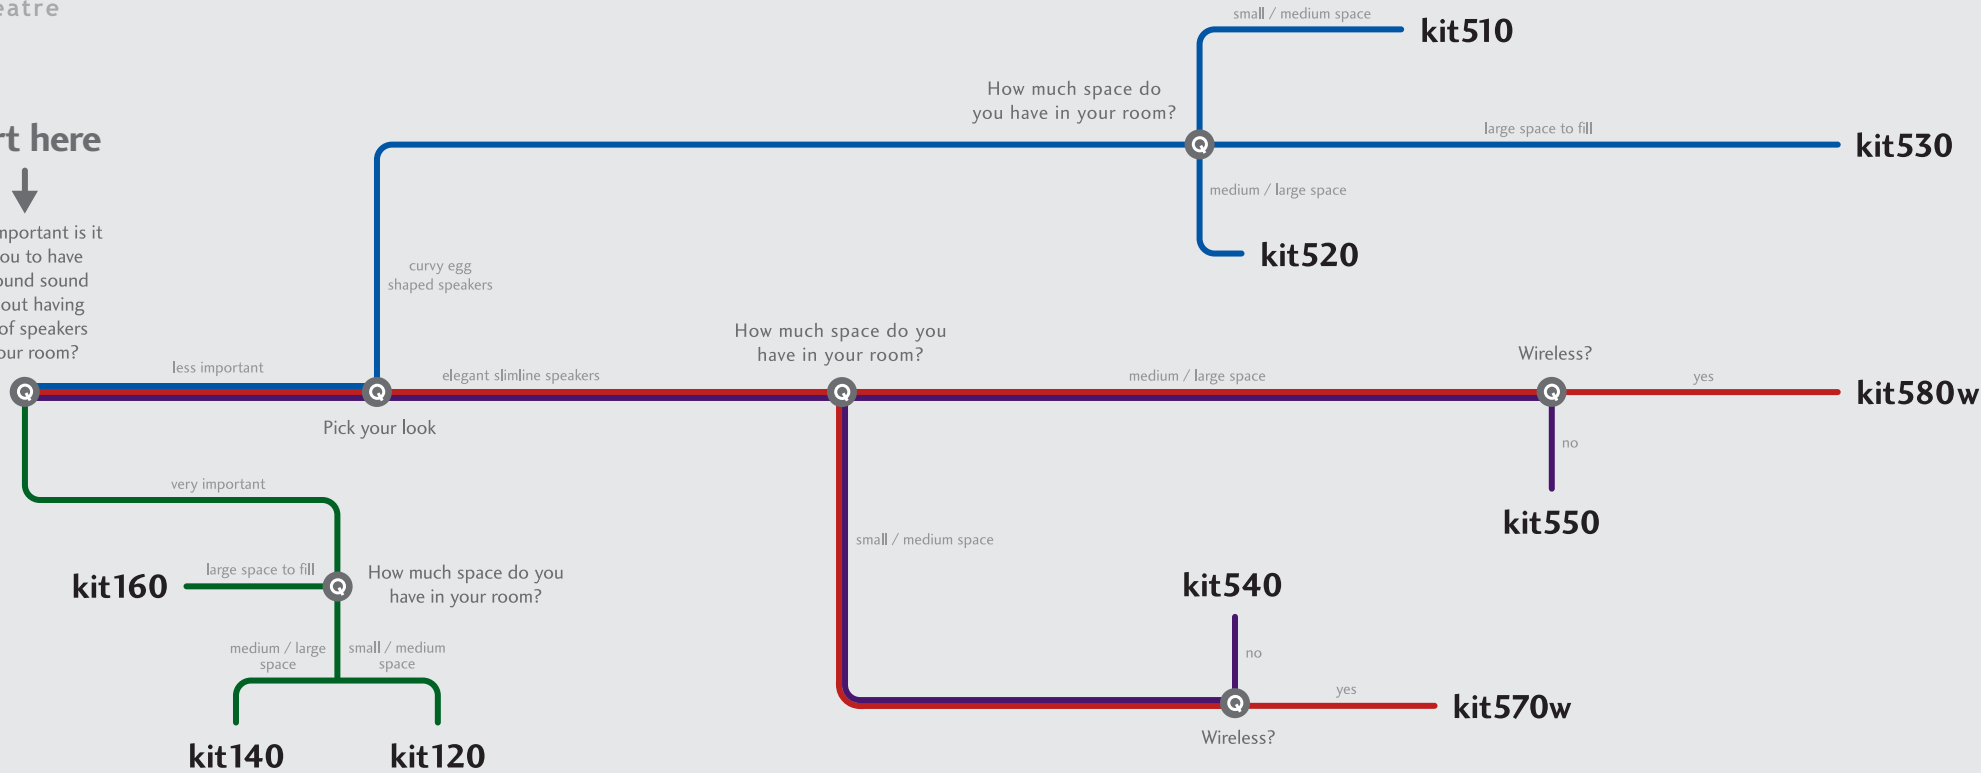

Identical to the kit550 in specification and performance, but with wireless signal transmission to the rear speakers for even greater convenience and ease of set-up.

How important is it to you to have surround sound without having lots of speakers in your room?

## the right one for you

Simplicity and choice is what the KIT concept is all about, and the easy to follow decision map opposite is there to simplify the process of choosing the system that best suits your home, your preferences and your lifestyle.

There are four different types of speaker to choose from, spanning logical steps in price and performance. They all offer true 'plug and play' convenience, with only a couple of cables to connect. And they all come as complete systems, with two or five main speakers, a subwoofer with integral amplifier and a matching CD/DVD player incorporating HDMI™ technology.

Whichever you choose, and whether you're into music, movies or games, your KIT system from KEF will open your eyes and ears to new standards of sound quality, user-friendliness and sheer listening pleasure for any room in the house that suits you. All you have to do is follow the map until you reach the model, then review the specification overleaf. And above all, visit [www.kef.com](http://www.kef.com) to find your local retailer and listen to the system in action. We know you'll be amazed...
