picoforte™

incredible sound meets innovative design

picoforte™ 1

Waking up the neighbours. Getting ready for a night out. Chillin' on the sofa in the early hours of Saturday morning. Watching that movie you downloaded. Let's face it, those dinky earplugs only go so far. Your player is bursting with tracks so now it's time to actually hear them.

Here at KEF, years of innovative award winning high-end Loudspeaker design have been poured into picoforte™. Curvacious, solid di-cast metal clad in clean high gloss white or rich high gloss black resulting in a compact system with "no compromise" sound for the way we live today. The picoforte will handle any digital sound your tastes can think of.

picoforte™ 3

KEF apply the same Uni-Q® "sit anywhere" technology to the picoforte speakers as they do in their high-end Loudspeakers. Thanks to that you can enjoy the same rich stereo sound wherever you are in the room. The picoforte is designed to be eye catching and simple to set up and as it is a component system you can place the speakers almost anywhere.

This is complete flexibility for your personal environment. Remote control, generous cable included so speakers aren't bunched together, TV connection for your movies. Even one for a subwoofer if you insist on property damage. picoforte... why compromise?
